Metamorphosis

Transformational Workshops

Have you ever found it difficult to decide which nutritional supplements you should be taking? Often times you are making your best guess based on how you are feeling or what you think you need. Wouldn't it be nice if you could ask your body what it preferred? With the Compass System you can.

The Compass System measures the power of dynamic changes in the electrical properties of the skin with Zyto's Decision Support Technology software and measures the fluctuations in energy patterns. The primary feedback mechanism is called GSR or Galvanic Skin Response. The Compass hand cradle sends stimuli to the body using digital signatures. Each stimulus creates a unique response which it then measures and analyzes. It's like asking the body questions about your nutritional products and listening to its answers.
